growth.

01 | Impact Assessment, Monitoring & Evaluation

EVIDENCE FOR BETTER DECISIONS

We design and implement robust impact, monitoring, evaluation and learning (IMEL) systems that generate credible evidence, enhance accountability and inform adaptive management. Our approach combines technical rigour with practical solutions tailored to development programmes, climate initiatives and enterprise support interventions.

Our services include:

Impact assessments and reporting

Baseline assessments

Monitoring and evaluation technical assistance

Midterm and end-term evaluations

Results frameworks and theory of change development

02 | Sustainability & Climate Advisory

SOLUTIONS FOR A RESILIENT TOMORROW

We provide strategic guidance to help organizations, governments and communities understand and respond to climate and environmental risks, integrate sustainability principles and achieve long-term value. Our advisory services support compliance with regulatory requirements, alignment with global standards and the transition to a low-carbon, resilient and inclusive future.

Our services include:

Sustainability & ESG services

Sustainability & ESG reporting

ESG & sustainability assurance

ESG compliance audits

Climate strategy advisory services

Carbon credit advisory services

Carbon measurement, reporting & verification

Net zero planning

03 | Capacity Building

PEOPLE. SYSTEMS. LASTING RESULTS

We strengthen the skills, systems and institutions needed for sustainable development. Our capacity building support empowers individuals, organizations and communities to deliver results, adapt to change and sustain impact long after a project ends.

Our services include:

Training needs assessment and capacity development plans

Customized training and learning programmes

Institutional strengthening support

Development of tools, manuals and guidelines

Coaching, mentoring and on-the-job support

Knowledge management and learning systems
